Friday—12/14/2018

18:00 - 20:00 - Special Considerations, Pediatrics - Special Needs Patients
Greg Brown

The special needs population is very diverse. They may include individuals who are disabled due to physical limitations, medical complications, developmental problems or cognitive impairments. If they are sick or injured, they may complicate your treatment. Join Greg as he discusses some tips on providing excellent clinical care and unique cultural sensitivity for your patients with disabilities.

20:00 - 22:00 - Cardiovascular Emergencies *Greg Brown*

Let's review some cardiac anatomy, basic EKG rhythm recognition, and some commonly seen cardiac emergencies. You never know what's in store for you in Greg's class, so come prepared to show your skills!

Saturday—12/15/2018

08:00 - 10:00 - Special Considerations, Pediatrics *Dr. Bradley Scoggins*

A major cause of illness and injury to pediatrics is respiratory illnesses and airway management complications. Dr. Scoggins will review these emergencies as well as presenting some common resuscitation scenarios for you to work through. Don't miss this exiting pediatric presentation!

10:00 - 12:00 - Cops and Their Vests: Blunt and Penetrating Trauma Emergencies
Sgt. Justin Rieker

You're responding to an MVC, only this time, an officer is involved. How do you remove his/her vest to evaluate and provide care? What do you do with their weapon? And what level of protection do their vests provide? Then we'll be discussing blunt and penetrating trauma, use of bleed control and complications of chest injuries and their appropriate treatments.

12:00—13:00— Lunch on your own

13:00—15:00 - CPAP and Airway lab *Jordan Richards*

When used correctly, CPAP has been shown to alleviate symptoms and decrease the need for intubation for patients with CHF, COPD and asthma. It is safe, portable and easy to apply. We will discuss using CPAP to provide respiratory support. And then let's review the tools in our Airway Adjunct bag! Plan on getting on your feet after lunch - no sitting around for this one!

15:00—17:00 - Stroke and Altered Mental Status *Jordan Richards*

Save a life from Stroke! Be sure you have the tools necessary to recognize a stroke. Strokes cause about one out of every 19 deaths in the US each year. Learn the latest stroke recognition tool, BEFAST - then stay tuned for some case studies and discussion on reasons for AMS
